

# Test Case 3a: DPW-III W1 & W2 (20 years later)

- Grid Convergence Verification of steady CFD analysis
- Settings
  - Steady CFD RANS French Vanilla SA-[neg] (All terms!)
    - Adiabatic Wall (not isothermal)
  - Converge residuals to machine precision ( $\sim 1e-10$ )
- Grids: [https://dpw.larc.nasa.gov/DPW8/Scatter/Test\\_Case\\_3](https://dpw.larc.nasa.gov/DPW8/Scatter/Test_Case_3)
  - DPW-III W1 wing-only geometry (with symmetry plane)
    - (L1:Tiny/L2:Coarse/L3:Medium/L4:Fine/L5:extra-fine/L6:Ultra-fine)
    - Six-member grid family; four are required, six are desirable
  - Encourage use of committee-supplied grids; user-generated grids are acceptable

## • Reference Units

Sref (semi-span grid)	Cref	Semispan	Moment Center
450.0 sq.in	7.7778 in	30.0 in	(6.0726, 0.0, 0.0)

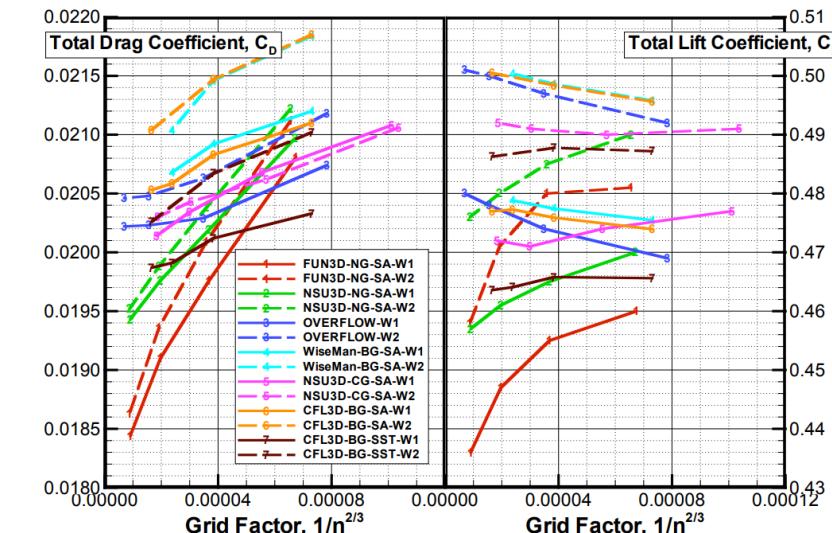

## • Conditions

Mach	Re <sub>c</sub>	$\alpha$	T <sub>static</sub> (120.33° F)	$\gamma$	Pr	Pr <sub>t</sub>	Farfield $\chi = \tilde{v}/v$
0.76	$5 \times 10^6$	0.50°	580.0 R   322.22 K	1.4	0.72	0.90	3

## • Sutherland's Law

$$\mu(T) = \mu_0 \left( \frac{T}{T_0} \right)^{3/2} \left( \frac{T_0 + S}{T + S} \right) \quad \mu_0 = 1.716 \times 10^{-5} \frac{\text{kg}}{\text{m s}} \quad T_0 = 491.6^\circ \text{R} \quad S = 198.6^\circ \text{R}$$

$$\frac{\mu(T)}{\mu_{ref}} = \left( \frac{T}{T_{ref}} \right)^{3/2} \left( \frac{1 + S/T_{fef}}{T/T_{fef} + S/T_{fef}} \right)$$
